## **Introduction**

---

Prior to Fiscal Year 1999, any client seen at an Oklahoma Department of Mental Health and Substance Abuse Services (ODMHSAS) contracted facility was reported, regardless of who paid for the service. Starting with Fiscal Year 1999, only clients funded in full or in part by ODMHSAS were reported. Therefore, previous years' reported client counts will be larger than in following years.

During the Fiscal Year 2003, the State of Oklahoma expenditures on community mental health services, inpatient facilities, substance abuse services, domestic violence/sexual assault services, and departmental management amounted to approximately \$199 million dollars. An unduplicated total of approximately 90,468 recipients were served system-wide in FY 2003. The unduplicated total of 90,468 recipients consists of 57,993 recipients that were admitted and served and 39,976 recipients that were contacts. The Data Book report is generated to provide basic information about these recipients and services they received for policy makers, interest groups, and others working to improve the quality of life for those in need.

The Data Book report is produced by the Evaluation and Data Analysis Section of the Decision Support Services Division at the Oklahoma Department of Mental Health and Substance Abuse Services (ODMHSAS). The report summarizes demographic information and services for clients served in agencies operated by or funded through ODMHSAS. To create the Data Book report, data are extracted from the ODMHSAS Integrated Client Information System (ICIS). ICIS contains demographic and service information about service recipients and agencies.

To meet the specific needs of a variety of entities, the Data Book report consists of two separate sections: Admitted Clients Served by Funding Source; Units of Service by Funding Source. The sections are then divided into tables and each table presents a different view of the data. Definitions of terms and a Map of Planning Areas are also provided.

# Definitions of Terms and Categorization Variables

---

The following are definitions of terms and categorization variables used in this Data Book report.

## **Admitted Clients Served**

Admitted Clients Served had an admission transaction in the ICIS before or during the report year and had received a service during the year. For this section, they are counted only once in the total for each level of aggregation. This is called an unduplicated count.

## **Age**

Client age is computed using the client's age at the middle of the fiscal year.

## **Contacts**

Individuals are counted as contacts when they call or visit an agency, but are not admitted.

## **Funding Source**

Funding Source helps identify the payment source of services. Frequently, clients receive services under multiple funding sources. The funding source categories for this report were Mental Health, Substance Abuse, Domestic Violence, Residential Care, Medicaid, and Other.

## **ICIS**

The Oklahoma Department of Mental Health and Substance Abuse Services maintains an agency-wide database, the Integrated Client Information System (ICIS), to which all Department-funded services and transactions are reported. The ICIS contains demographic and service information about clients and agencies.

## **ODMHSAS**

## **Other Indicators**

There are several groups of clients that are of special interest because they have special treatment needs, state or federal requirements regarding their placement or the services they receive, or because they are part of a priority population. The definitions of these groups and criteria for their selection are provided below:

- **Custody of DHS**

The client, 18 years of age or younger, is in the custody of the Department of Human Services.

- **Custody of DOC**

The client is in the custody of the Department of Corrections. Clients under house arrest, electronic monitoring, or in prison are all considered to be in the custody of DOC. Clients on probation or parole are not.

- **Custody of OJA**

The client, 18 years of age or younger, is in the custody of the Office of Juvenile Affairs.

- **Deaf and Hearing Impaired**

Clients who are deaf, hard of hearing, or indicated the need for an interpreter for the deaf were grouped to form the Deaf and Hearing Impaired category.

- **Homeless**

A homeless person under ICIS criteria is a person who: (a) lacks a fixed, regular and adequate night time residence AND (b) has a primary night time residence that is a supervised publicly or privately operated shelter designed to provide temporary living accommodations including welfare hotels, congregate shelters, halfway houses, and transitional housing for the mentally ill; or an institution that provides a temporary residence for individuals intended to be institutionalized; or a public or private place not designed for, or ordinarily used as, a regular sleeping accommodation for human beings, not limited to people living on the streets. Individuals are considered homeless if they have lost their permanent residence, and are temporarily living in a shelter to avoid being on the street. Prisoners being released or in the custody of a correctional facility are not considered homeless at the time of admission for treatment. The definition also excludes persons in a hospital, residential care facility, commercial hotel/motel, supervised apartment, or living with parent/other relative (even if only temporarily). The definition does include domestic violence and sexual assault shelters, as the persons have fled a residence that is not adequate (i.e., not safe).

- **Legal Status**

Legal Status has three categories; Voluntary, Civil Involuntary, and Criminal Involuntary. The categories of legal status (with ICIS codes) are as follows:

**Voluntary.** These clients enter treatment voluntarily and are coded Voluntary Admission (01), Court Voluntary (02), Informal Admission (16), or Other (18).

**Civil Involuntary.** These clients are required by the court system to receive services, even though they may be reluctant. ### **Various Categories:**

In response to many special report requests in past years, the special reports table was generated to address the majority of those requests.

## **Description of Sections and Tables**

---

The Data Book consists of two sections. The first section displays Counts of Admitted Clients Served by Funding Source for Sex, Age, Race, Presenting Problem/Diagnosis, County of Residence, and Other Indicators. The second section presents Counts of Day and Hourly Units of Service by Funding Source for Admitted Clients and Contacts. Each section contains six tables presenting data for 1) Statewide Total, 2) Agency, 3) Agency Type, 4) Count of Residence, 5) Planning Area, and 6) Various Categories.

### **Section One: Admitted Clients Served by Funding Source**

Admitted Clients Served are clients who have an admission transaction in the ICIS before or during the report year and had received a service during the report year. For this section, they are counted only once in the total for each level of aggregation or category in which they appear. This is called an unduplicated count. For example, a client may receive services at one hospital and then receive services at another hospital in the same year. This client would be counted twice (once at each hospital) in the agency report, but only once in the agency type and statewide tables. Because information such as age and sex should remain constant (except for data entry errors), counts for categories of these variables will sum to the total clients served on each table. Variables that might change from admission at one facility to admission at another or over time, (e.g., legal status, diagnosis, and target population) can be counted in more than one category and should not be summed.

This section shows only clients who were admitted for services and excludes contacts. It enumerates admitted clients, but further limits the counts to specific subgroups of the client population. Each individual counted has received a service at some time during the year regardless of the year he/she was admitted. Clients are grouped by frequently referenced demographics: Sex, Age, Race, Presenting Problem/Diagnosis, County of Residence, and Other Indicators. A client may be in more than one of these groups, or a client's group may change during the year. As a result, the sum of target populations exceeds the total number served. However, for any given population, the age, race, and sex, which do not change (age is calculated as of a single point in time), are unduplicated counts and should equal the total.

## **Section Two: Units of Service by Funding Source**

This section helps to quantify the Department's impact on the community by reporting the total number of individuals identified as receiving a service during the fiscal year. It also presents Summaries for all types of services funded through the ODMHSAS.

Individuals are counted as contacts when they call or visit an agency, but are not admitted. In general, a person can be reported as a contact twice at the same agency within a twelve-month period, but services are not given a third time without an admission. A client can also seek services at another agency and be counted as a contact there. In the Data Book report, an agency's contact counts exclude individuals who are subsequently admitted there. Additionally, two types of contacts are excluded from counts: Emergency Contacts and Group Contacts. In these cases, individuals are not identified and their addition would likely produce duplicated counts. However, the services to those individuals are reported.
