

Reduction in Drug Use Month Detail Report

Reduction in drug use between 01/01/2009 and 12/31/2009 at
(541) Family & Children's Services

Printed Date: 2/17/2010

Data Last Updated on: 02/17/2010

Report Description:

Measure: Reduction in Drug Use

This report reflects the number of individuals who have reported a reduction in drug use between the selected month and seven months prior to the selected month. For example, if the indicated month is June 2008, reported drug use is compared between December 1, 2007 and June 30, 2008. To be included in this report, an individual must receive three services from contract sources Community Mental Health (01), or Medicaid Services for which DMHSAS Pays Match, Adults (50). Only clients that are active at the beginning of the seventh month i.e December 1, 2007 in the example above are included.

Exclusion:

1. PACT clients
2. Discharge code 68 (Death)
3. Discharge code 65 (Incarcerated)
4. Persons under 18 years of age on the date of service
5. Data that is missing, invalid, or does not fit the criteria

Definitions:

Drug Use: Describes whether drug use has increased, decreased, or remained the same between the selected month and seven months prior to the selected month.

Count: The number of individuals in each category of drug use.

Percent: The number of clients who reported a decrease in drug use between the selected month and seven months prior to the selected month divided by the provider's total number of clients reported to have improved, worsened, or exhibited no change in drug use x 100.

Improve: Frequency of reported drug use at selected month is lower than reported drug use at seven months prior to selected month.

No Change: Drug use did not increase or decrease within measurement period (between selected month and seven months prior to selected month).

Worsen: Frequency of reported drug use at selected month is greater than reported drug use at seven months prior to selected month.
