

Improvement in CAR Score - Interpersonal Domain

Month Detail Report

Improvement between 07/01/2009 and 12/31/2009 at
(541) Family & Children's Services

Printed Date: 2/17/2010

Data Last Updated on: 02/14/2010

Report Description:

Measure: Improvement in CAR Score: Interpersonal Domain

This report reflects the number of individuals who have an improvement in the Interpersonal domain of the CAR scores between the selected month and seven months prior to the selected month. For example, if the indicated month is June 2008, the CAR score that was active on December 1, 2007 is compared to the most recent CAR score for June 30, 2008. To be included in this report, an individual must receive three services from contract sources Community Mental Health (01) or Medicaid Services for which DMHSAS Pays Match, Adults (50). Only clients that are active at the beginning of the seventh month (i.e., December 1, 2007 in the example above) are included.

Exclusion:

1. PACT clients
2. Discharge code 68 (Death)
3. Discharge code 65 (Incarcerated)
4. Persons under 18 years of age on the date of service
5. Data that are missing, invalid, or do not fit the criteria

Definitions:

CAR Score - Interpersonal: Measures the adequacy with which the person is able to establish and maintain interpersonal relationships.

Relationships involving persons other than family members should be compared to similar relationships by others of the same age, gender, culture, and life circumstances. This measure documents the client's ability to respond to affection and human contact, their capacity for empathy and ability to engage in social interaction.

Improve: CAR Score - Interpersonal at selected month is at least 5 points lower than CAR Score - Interpersonal at seven months prior to selected month, or a score of 15 has been attained.

No Change: CAR Score - Interpersonal did not decrease by at least 5 points or increase within measurement period (between selected month and seven months prior to selected month).

Worsen: CAR Score - Interpersonal at selected month is higher than CAR Score - Interpersonal at seven months prior to selected month.

Percent: The number of clients who reported an improvement (lower score; see definition for 'Improvement' above) in CAR Score - Interpersonal between the selected month and seven months prior to the selected month divided by the provider's total number of clients reported to have improved, worsened, or exhibited no change in CAR Score - Interpersonal x 100.
