

Improvement in CAR Score - Self Care/Basic Needs Benchmark Comparison for: Jan 2012 - Jun 2012

Printed: 8/16/2012

Printed Date: 8/16/2012

Benchmark finalized on 10/1/2009

Report Description:

Measure: Improvement in CAR Score: Self Care/Basic Needs Domain

This report reflects the number of individuals who have an improvement in the Self Care/Basic Needs domain of the CAR scores between the selected month and seven months prior to the selected month. For example, if the indicated month is June 2008, the CAR score that was active on December 1, 2007 is compared to the most recent CAR score for June 30, 2008. To be included in this report, an individual must receive three services from contract sources Community Mental Health (01) or Medicaid Services for which DMHSAS Pays Match, Adults (50). Only clients that are active at the beginning of the seventh month (i.e., December 1, 2007 in the example above) are included.

The intent of this report is for providers to compare their performance on the set measure for any six month period to the benchmark as determined in the six month period between 01/01/2008 and 4/30/2009. The report shows data for the past six months from the end date entered.

Exclusion:

1. PACT clients
2. Discharge code 68 (Death)
3. Discharge code 65 (Incarcerated)
4. Persons under 18 years of age on the date of service
5. Data that are missing, invalid, or do not fit the criteria

Definitions:

CAR Score - Self Care/Basic Needs: Measures the adequacy with which the person is able to care for him/herself and provide his/her own needs such as food, clothing, shelter and transportation. This measure documents the person's ability to make reliable arrangements appropriate to his/her age, gender, culture and life circumstances. If the client lives in a supportive or dependent situation for reasons other than lack of ability (e.g. confined on criminal sentence), this domain estimates the ability to make arrangements independently and freely. Children, the disabled and elderly persons who are cared for by others should also be rated on their own ability to make arrangements compared to others their age. This measure reflects whether the person can be left alone for a period of time; makes known medical/dental needs; tends to self-grooming and appropriate dress; and takes medication as prescribed.

Improve: CAR Score - Self Care/Basic Needs at selected month is at least 5 points lower than CAR Score - Self Care/Basic Needs at seven months prior to selected month, or a score of 15 has been attained.

No Change: CAR Score -Self Care/Basic Needs did not decrease by at least 5 points or increase within measurement period (between selected month and seven months prior to selected month).

Worsen: CAR Score - Self Care/Basic Needs at selected month is higher than CAR Score - Self Care/Basic Needs at seven months prior to selected month.

Percent: The number of clients who reported an improvement (lower score; see definition for 'Improvement' above) in CAR Score - Self Care/Basic Needs between the selected month and seven months prior to the selected month divided by the provider's total number of clients reported to have improved, worsened, or exhibited no change in CAR Score - Self Care/Basic Needs x 100.

Average: The arithmetic mean of the data. In a data set, the mean is the sum of the data divided by the number of data points.

Standard Deviation: A measure of the dispersion or spread of the data. One standard deviation above and below the average determines the upper and lower limits.

Upper Limit: Average plus one standard deviation.

Lower Limit: Average minus one standard deviation.

Benchmark: A standard by which providers may be measured or judged

How the Benchmark is Determined:

The benchmark is determined by the distribution of data from all 15 Community Mental Health Centers for a period of six months (05/01/2008 - 10/31/2008). From these data points, the average and standard deviations were calculated. These statistics were then used to establish the benchmark. The benchmark is utilized to assess monthly performance.

Benchmark categories are based on the average and upper and lower limits, as established in this report:

None: No points are awarded to an agency with a percentage below the lower limit.

One Point: An agency will receive one point when its monthly performance percent falls below the average but on or above the lower limit.

Two Points: An agency will receive two points when its monthly performance percent equals or exceeds the average.

Bonus: Bonus points will be awarded to providers whose monthly percentage equals or exceeds the upper limit.

Report Information:

Frequency of update: Claims are updated weekly. CDCs are updated weekly.

Last updated: Last paid claim is through 08/12/2012, CDCs are through 08/14/2012.
