Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Clients Not Seen Within 90 Days	0	0.0

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the last admission was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

THE LASTSTOP (214)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

	Count	Percent
Clients Not Seen Within 90 Days	10	3.2

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

NORTHWEST CENTER FOR BEHAVIORAL HEALTH (301)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

HUMAN SKILLS & RESOURCES (461)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

91 Administrative Discharge												

	Count	Percent
Clients Not Seen Within 90 Days	222	64.0

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

PAYNE COUNTY DRUG COURT, INC. (462)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

	Count	Percent
Clients Not Seen Within 90 Days	0	0.0

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the last admission was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

SHEKINAH COUNSELING SERVICES (464)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

	Count	Percent
Clients Not Seen Within 90 Days	5	100.0

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the last admission was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

SHADOW MOUNTAIN BEHAVIORAL HEALTH SYSTEM (470)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

	Count	Percent
Clients Not Seen Within 90 Days	6	8.5

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the last admission was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

RIVERSIDE COUNSELING (476)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

	Count	Percent
Clients Not Seen Within 90 Days	10	30.3

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the last admission was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Oklahoma Department of Mental Health and Substance Abuse Services

BILL WILLIS MENTAL HEALTH (503)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the last admission was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face 😐, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

M.H. SERVICES OF SOUTHERN OKLAHOMA (552)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

91 Administrative Discharge												

	Count	Percent
Clients Not Seen Within 90 Days	32	7.5

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

RED ROCK BEHAVIORAL HEALTH SVC (553)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

CREOKS MENTAL HEALTH SERVICES (561)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

	Count	Percent
Clients Not Seen Within 90 Days	4	10.8

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the last admission was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Oklahoma Department of Mental Health and Substance Abuse Services

TRI-CITY SUBSTANCE ABUSE CTR (639)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Clients Not Seen Within 90 Days	4	1.4

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

NEW HOPE OF MANGUM (643)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

THE REFERRAL CENTER (644)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face 😐, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Oklahoma Department of Mental Health and Substance Abuse Services

ALPHA II, INC. (654)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

THE OAKS REHAB. SERVICES CTR (655)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the last admission was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

ROADBACK, INC. (657)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

	Count	Percent
Clients Not Seen Within 90 Days	1	0.8

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

	Count	Percent
Clients Not Seen Within 90 Days	8	5.6

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

BRIDGEWAY (663)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Oklahoma Department of Mental Health and Substance Abuse Services

YWCA CRISIS CENTER (671)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

	Count	Percent
Clients Not Seen Within 90 Days	26	29.9

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

FAMILY CRISIS CTR, INC. (684)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

	Count	Percent
Clients Not Seen Within 90 Days	4	12.1

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

	Count	Percent
Clients Not Seen Within 90 Days	27	10.3

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

METRO TULSA SUBSTANCE ABUSE SERVICE (904)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Oklahoma Department of Mental Health and Substance Abuse Services

MUSKOGEE COUNTY COUNCIL OF YOUTH SERVICES (905)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

	Count	Percent
Clients Not Seen Within 90 Days	69	71.9

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face 😐, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the last admission was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Clients Not Seen Within 90 Days	53	61.6

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the last admission was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

DRUG RECOVERY, INC. (910)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Oklahoma Department of Mental Health and Substance Abuse Services

TRI-CITY YOUTH & FAMILY CENTER (911)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Clients Not Seen Within 90 Days	85	24.3

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Clients Not Seen Within 90 Days	2	3.3

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

COMMUNITY ALCOHOLISM SERVICES (915)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Oklahoma Department of Mental Health and Substance Abuse Services

BROADWAY HOUSE, INC. (919)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Clients Not Seen Within 90 Days	0	0.0

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the last admission was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

EDMOND FAMILY SERVICES, INC. (929)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Clients Not Seen Within 90 Days	160	76.9

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the last admission was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

GATEWAY TO PREVENTION/RECOVERY (934)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Clients Not Seen Within 90 Days	2	5.0

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

TOTAL LIFE COUNSELING (938)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Oklahoma Department of Mental Health and Substance Abuse Services

A BETTER CHANCE (940)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

	Count	Percent
Clients Not Seen Within 90 Days	129	81.1

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

INDIAN HEALTH CARE RESRCE CTR (943)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Clients Not Seen Within 90 Days	6	12.2

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the *last admission* was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

ROGERS COUNTY DRUG ABUSE (949)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the *last admission* was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

NEW DIRECTIONS (957)

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

	Count	Percent
Clients Not Seen Within 90 Days	14	16.3

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the last admission was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

	Count	Percent
Clients Not Seen Within 90 Days	0	0.0

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the last admission was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face 😐, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Adult Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Clients Not Seen Within 90 Days

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Drug Court Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face 😐, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the last admission was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

FOCUS (463)

Adult Drug Court Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

OKLAHOMA FAMILIES FIRST, INC. (467)

Adult Drug Court Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the last admission was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

COUNSELING CENTER OF S.E. OKLAHOMA (471)

Adult Drug Court Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

RED ROCK BEHAVIORAL HEALTH SVC (553)

Adult Drug Court Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the last admission was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

Adult Drug Court Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face 😐, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Oklahoma Department of Mental Health and Substance Abuse Services

12 & 12, INC. (640)

Adult Drug Court Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

	Count	Percent
Clients Not Seen Within 90 Days	1	3.6

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Drug Court Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Oklahoma Department of Mental Health and Substance Abuse Services

THE OAKS REHAB. SERVICES CTR (655)

Adult Drug Court Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

	Count	Percent
Clients Not Seen Within 90 Days	5	9.4

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Oklahoma Department of Mental Health and Substance Abuse Services

CAA TURNING POINT (901)

Adult Drug Court Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

91 Administrative Discharge												

	Count	Percent
Clients Not Seen Within 90 Days	4	6.8

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Drug Court Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

	Count	Percent
Clients Not Seen Within 90 Days	49	50.0

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Drug Court Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Drug Court Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

	Count	Percent
Clients Not Seen Within 90 Days	1	2.2

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.
Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.
 For clients with more than one admission in a year, information reported at the *last admission* was selected.
 For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.
 The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.
 The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.
Average Hours Per Client is the units of service divided by the number of clients in the level of care.
Average Daily Census is the units of service in the level of care divided by 365.
Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Oklahoma Department of Mental Health and Substance Abuse Services

INDIAN HEALTH CARE RESRCE CTR (943)

Adult Drug Court Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

	Count	Percent
Clients Not Seen Within 90 Days	6	31.6

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult Drug Court Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Oklahoma Department of Mental Health and Substance Abuse Services

COMMUNITY DEVELOPMENT SUPPORT ASSOCIATION (221)

Adult TANF / CW Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult TANF / CW Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult TANF / CW Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult TANF / CW Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the last admission was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult TANF / CW Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult TANF / CW Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Clients Not Seen Within 90 Days	15	51.7

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. MONARCH, INC. (651)

Adult TANF / CW Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at admission was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the last admission was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult TANF / CW Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult TANF / CW Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

MUSKOGEE COUNTY COUNCIL OF YOUTH SERVICES (905)

Adult TANF / CW Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Adult TANF / CW Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Oklahoma Department of Mental Health and Substance Abuse Services

PEOPLE INCORPORATED (933)

Adult TANF / CW Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Clients Not Seen Within 90 Days	160	76.9

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

TOTAL LIFE COUNSELING (938)

Adult TANF / CW Clients

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

Clients Not Seen Within 90 Days	Count	Percent										
	86	43.7										

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.

Provider Performance Management Report

Prepared by the
Evaluation and Data Analysis Section
Decision Support Services Division

June 2005

V 2.0

For all measures:

- Clients had to be formally admitted and receive at least one service during the calendar year that met one of the following criteria:
 - o the service was paid for through a substance abuse contract source (02, 03, 17, 18, 19, 20, 21, 23, 27, 28, 29, 37 or 44), or;
 - o the service was received at a state-operated facility and had a substance abuse service focus code (02, 03 or 09), or;
 - o the service was received at a state-operated substance abuse facility under contract source (30, 50, 51 or 52) with a substance abuse service focus code of (06), or;
 - o the service was received under contract source (50) with a substance abuse service focus code of (02, 03, 09 or 06), or;
 - o the service was received at a state-operated community mental health facility for a Medicaid - eligible client (contract source 50 or 51) with a substance abuse service focus code (02, 03 or 06).

For all measures BUT Initiation and Engagement in Treatment, the following clients were excluded:

- Clients identified as dependents or codependents
- Clients discharged due to "Death," "Incarceration" or "Failed to Begin Treatment"
- Detox clients with presenting problems of *abuse* rather than *dependence*.

State Average - The average score among all the providers for a particular indicator.

Comparing Score to State Average (Avg) - An up arrow ↑ indicates the agency score is at or above the state average. A down arrow ↓ indicates the agency score is below that state average.

Agency Demoninator - The number of clients at risk for the indicator event.

Agency Numerator - The number of clients for whom the indicator event did occur.

Rank - An agency score in relative position to all other agency scores compared to the number of agencies. One is the highest. The number of agencies might vary because of ties.

Quartiles - After the agencies are ranked, they are then divided into 4 parts, each containing a quarter of the agencies. A quarter of the agencies with the highest ranking will receive a happy face ☺, agencies falling into the middle 2 quartiles will receive a normal face ☹, and agencies scoring in the bottom quartile receive a sad face ☹.

TANF/CW Clients - clients who received services paid for through a TANF contract source (44).

Drug Court Clients - clients who received services paid for through a drug court contract source (20).

Short-Term Indicator Notes:

Level of Functioning Improvement - The change in level of functioning from admission to last transaction reported to ICIS. Any positive change is counted. To be included Outpatient and Halfway House clients must have at least two ICIS/CDC transactions with at least 30 days between the transactions and Residential Treatment and Detox clients must have at least two transactions.

Consumer Involved in Meaningful Employment - The change in employment status from admission to the last transaction reported to ICIS. A positive change is counted when the client has an employment status of Unemployed or Not in Labor Force at admission and an employment status of Full-time or Part-time at last transaction. To be included Outpatient and Halfway House clients must have at least two transactions, with at least 30 days between the transactions, and Residential Treatment clients must have at least two transactions. Clients under 18 or over 60 years of age are excluded.

Planned Discharge - a discharge is considered "planned" when the primary clinician reports that the client has successfully completed his/her individualized treatment goals. For demographic information, transferred clients (transaction type 40) are counted as planned discharges. As with the other short-term outcome measures, the following clients were excluded: clients identified as dependents or co-dependents and clients discharged due to Death, Incarceration or Failed to Begin Treatment.

14-Day Follow-up - The amount of continuity of care occurring between two levels of care or two agencies. A client is counted as having a follow-up if a service is received at a lower level of care within 14 days of discharge. For detox, any service other than detox meets the requirement. For residential treatment, the follow-up service must be halfway house or outpatient. Follow-up services can only be counted if they are reported in ICIS, thus, services provided by non-DMHSAS facilities are not included. Crisis services are not counted as a lower level service.

Community Tenure - 30/90 Days - This is a measure of clients who are NOT readmitted. A readmission occurs when clients have been discharged or transferred from residential treatment then return within 30/90 days to any residential treatment facility. Readmission is counted against the discharging/transferring facility. Clients discharged due to Death, Incarceration or Failed to Begin Treatment are excluded.

Initiation/Engagement in Treatment - For Outpatient and Halfway House treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation. For Detox services, clients are counted as *initiating* treatment when they receive a follow-up service within 14 days of discharge and counted as *engaging* in treatment when they receive two additional services within 30 days of initiation.

For Residential Treatment services, clients are counted as *initiating* treatment when they receive a second service within 14 days of the first service. Due to the nature of residential treatment, nearly all clients are initiated. Clients are counted as *engaging* in treatment when they receive two additional services within 30 days of discharge from residential treatment.

Long-Term Outcome Notes:

Long Term Outcomes are a way to monitor agency performance by examining DUI convictions, imprisonment, wages and mortality before and after discharge from treatment. Administrative data are acquired from various state agencies and merged with DMHSAS data to determine the extent to which client contacts with these agencies change following treatment. Measures are ONLY for adults who received substance abuse treatment in a program operated or contracted by DMHSAS during 2000.

DUI Conviction Free - Among clients with a DUI conviction in the year before discharge, the percentage who DO NOT received a DUI conviction in the year after discharge.

Incarceration Free - Among clients who served time in prison in the year before discharge, the percentage who DO NOT re-incarcerated in the year after discharge.

Arrest Free - Among clients with an arrest in the year before discharge, the percentage who DO NOT have an arrest in the year after discharge.

Survival- The percent of clients who DO NOT die in the year after discharge.

DUI Conviction Percent Difference - The percentage of clients who received a DUI conviction in the year after discharge, subtracted from the percentage of clients who received a DUI conviction in the year before discharge.

Incarceration Difference - The percentage of clients who served time in prison in the year after dischargesubtracted from the percentage of clients incarcerated in the year before discharge.

Arrest Percent Difference - The percentage of clients who have an arrest in the year after discharge, subtracted from the percentage of clients who have an arrest in the year before discharge.

Median Wages Difference - Among all clients, median wages earned in the year after discharge subtracted from median wages earned in the year before discharge.

Clients with Wages Difference - The percent of all clients who earned wages in the year after discharge subtracted from the percent of clients who earned wages in the year before discharge.

Consumer Survey Notes:

The ODMHSAS provides publicly-funded substance abuse treatment service providers confidential survey packets to distribute to their clients as an ongoing part of their discharge planning process. Clients are asked to fill out paper questionnaires to tell about their experience with the provider agency, and mail their replies to ODMHSAS. The ODMHSAS Decision Support Services office provides quarterly and annual summaries of the survey results to participating providers.

General Notes:

Agency Comparison - Variation in client substance abuse severity among different types of treatment facilities requires agency performance be compared with caution.

Data Acquisition - Client demographics and the information necessary for analysis and matching to administrative databases were obtained from the data elements reported in the ODMHSAS Client Data Core (CDC) and the Services Sheet. The CDC, completed at admission for all clients, collects demographics and information pertinent to substance abuse problems such as drug of choice, presenting problem, age at first use and Addiction Severity Index (ASI) composite scores. Relevant fields on the CDC are updated with changes in a client's status and at discharge from treatment. The Service Sheets records type and duration of each service, location of service, and funding source, as well as staff providing the service.

Descriptive Statistics Notes:

Clients Admitted and Served represents the number of clients admitted to substance abuse treatment who received a substance abuse service during the calendar year. Information reported at *admission* was used to calculate demographic percentages including sex, age, race, homeless, IV drug user, drug of choice, pregnancy, DOC custody, and No ASI.

For clients with more than one admission in a year, information reported at the *last admission* was selected.

For **Drug of Choice**, clients are allowed to identify up to three drugs. All drugs reported are included, so the total may add up to more than 100 percent. For each drug of choice clients select, a route of administration is requested. The identification of IV as a route for any of the three drug choices is counted as **IV Drug Use**.

The **Outpatient Staff Profile by Degree** and the **Outpatient Staff Profile by Certification** include only the staff providing hourly outpatient services.

The **State Average (%)** is the percent of clients with the characteristic among all clients in the state.

Average Hours Per Client is the units of service divided by the number of clients in the level of care.

Average Daily Census is the units of service in the level of care divided by 365.

Clients Not Seen Within 90 Days: the number of admitted clients with the last service at the agency in the fiscal year and no discharge for 90 days or greater. Includes all clients served at the agency, regardless of funding source.
