

CMHC Performance Management Report (CMHC-PPMR)

Grand Lake MHC (554)

Printed Date: 2/9/2008

Data Last Updated on: 02/03/2008

Report Period: 01/01/2007 to 12/31/2007

Report Description:

The intent of the CMHC Performance Management Report (CMHC-PPMR) is for providers to quickly identify areas of achievement and areas for improvement. By comparing their score to the systemwide score or their previous year's score, providers are able to determine which outcomes and/or performance measures may need additional work.

DEFINITIONS:

All Mental Health Contract Sources: Includes the following contract source codes: 01, 24, 25, 30, 32, 33, 39, 42, 43, 45, 47, 48, 50, 51, 52, 53, 56, 57, 58, 63, 64.

Systemwide Score: Total number of episodes across all agencies which resulted in a positive outcome divided by the total number of episodes multiplied by 100.

Agency Score: Total number of episodes at this agency which resulted in a positive outcome divided by the total number of episodes multiplied by 100.

Agency Numerator: Total number of episodes at this agency which resulted in a positive outcome.

Agency Denominator: Total number of episodes at this agency.

Agency vs Systemwide: If the agency score was equal to or higher than the state score, an up arrow will be shown. Otherwise, there will be a down arrow.

Rank: Of all the agencies which have episodes included in this measure, this measure shows where this agency is in order from high to low. Ties are possible. The number of possible agencies can vary, because some agencies may not have any episodes which meet the criteria for inclusion.

For example, if an agency does not have anyone who is homeless at admission, that agency would be excluded from the Reduction of Homelessness measure.

Quartiles: The quartile indicates if the agency's score falls within the top 25% of agencies, the middle 50% of agencies, or the bottom 25% of agencies. If fifteen agencies were included in the measure, four would be in the top, seven would be in the middle, and four would be in the bottom.

Previous Report Period: This represents the agency scores for the previous year. If the report was produced for FY07, this part of the report would show the results for FY06.

Current vs Previous: If the agency score for the current report period is higher than the previous report period, a 'Thumbs Up' will be shown. Otherwise, a lower score will produce a 'Thumbs Down'.

Notes:

Data for this report are only updated by ODMHSAS staff at intervals. If the "Data Last Updated on:" is more than two weeks past, please contact Mark A. Reynolds at mreynolds@odmhsas.org or (405) 522-3824.

DRAFT

CMHC Performance Management Report (CMHC-PPMR)

Grand Lake MHC (554)

Frequently Asked Questions (FAQs)

Why is the number of agencies listed in my "Comparison of All Agencies Report" different than the number of agencies listed in the ranking portion of this report?

Agencies which have a denominator of 5 or less are excluded.

Why can't I select the time period I want, rather than the time periods you select? For example, I just want the report for the last six months.

Each time we create a new report, we have to create the report for every agency. The process takes about 1 hour to create the new report. If you would like a report for a time period we do not already have, please contact Mark A. Reynolds at mreynolds@odmhsas.org or (405) 522-3824.

I could use a little more explanation about this and other reports. Can someone help me?

Absolutely. The first option would be to request an onsite visit from the Data Integrity Review Team (DIRT). A large portion of their visit is instruction on how to use this report and others available in ICIS. You can contact the project coordinator, Martha Moore at (405) 522-3818 or mmoore@odmhsas.org. The second option would be to schedule a phone conference with Mark A. Reynolds at mreynolds@odmhsas.org or (405) 522-3824.

Will you be adding additional measures?

Yes. As the operational definitions are provided, those new measures will be added to this report.

Who gets to decide which measures are included?

There are two separate ways measures are chosen for inclusion. The first way is the one where SAMHSA defines for states the measure and requires states to measure and report. The other method is meetings held with CMHC staff. For example, on September 5th, 2007, ODMHSAS staff meet with CMHC staff to discuss current measure and which new measures the providers would like to see.
