

## *ASAM Placement Tool Instructions*

### **Instructions for Determining Residential Level of Care Treatment Eligibility**

When an individual presents at an outpatient provider agency, and it appears they may need a residential level of care substance use disorder treatment, an American Society of Addiction Medicine (ASAM) placement tool is completed. This tool may also be completed by the residential level of care provider in certain circumstances (see below). The ASAM placement tool determines if the individual is appropriate for residential level of care services and what specific ASAM level of care of is most aligned with the individual's needs: ASAM 3.1 (Halfway House), ASAM 3.3 (Co-Occurring Residential), ASAM 3.5 (Residential/Intensive Residential), or ASAM 3.7 (Medically Supervised Withdrawal Management).

To determine if an individual meets the appropriate ASAM level for residential treatment, the outpatient provider goes to PICIS, clicks on the ASAM link, searches for the client's CDC, and inputs scores. ASAM placement can be attached to transaction types 21, 23, 27, 40, 41 or 42. The transaction date must not be more than 30 days old and only one ASAM can be added to a CDC.

Once the ASAM placement is completed in PICIS, the ASAM level of care score will be generated. If residential treatment is appropriate for the individual, the outpatient provider will be taken to the bed availability list and find a bed at a residential treatment facility with the appropriate ASAM level. Once a release of information is obtained from the individual, the outpatient provider will make a referral to the residential treatment provider. The residential treatment provider can enter the Member ID in the PICIS reports ([Residential TX Reports > Residential Treatment Providers > ASAM Placements For Admissions](#)) and see the ASAM or ASAM/ASI scores to ensure the client is appropriate for that level of care. For outpatient providers to view completed ASAMs placements they will visit PICIS reports: [Residential TX Reports > Outpatient Providers > Completed ASAM Placements](#).

If an individual presents at the residential treatment facility, the provider will search for the member ID in the PICIS reports ([Residential TX Reports > Residential Treatment Providers > ASAM Placements For Admissions](#)) to see if an ASAM placement has been completed within the last 30 days. If no scores are found or the scores are more than 30 days old, the residential treatment provider will do a transaction type 21 and complete an ASI and ASAM. The scores will be entered into PICIS and if residential

### *ASAM Placement Tool Instructions*

treatment is appropriate for the individual, a transaction type 23 will be done to admit the client.

#### **Correcting A Recently Submitted ASAM**

If an ASAM needs to be corrected, it may be updated once in PICIS where the ASAM was completed by clicking the edit button. The provider may also complete a new CDC and then the correct info into the ASAM. The type of new CDC submitted will depend on transaction order. If the client has not been fully admitted into services, a CDC 27 will be completed, if the client has been admitted, a CDC 41 will be needed. Completed ASAM criteria info will not be deleted.

#### **ASAM Placement Tool and Prior Authorization**

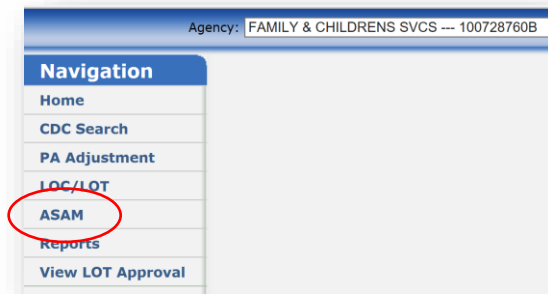

If the ASAM placement tool is completed and it recognizes the individual is appropriate for residential level of care treatment, the placement tool will allow for a prior authorization for treatment of up to 30 days to be submitted from the day of admission to the residential level of care facility. Residential level of care providers may request extensions of this initial prior authorization in 30 day increments by completing the ASAM placement tool again for each extension.

## ASAM Placement Tool Instructions

### Accessing the Placement Tool

- To enter ASAM/ASI scores in PICIS, an ASAM link has been added to the home page.

- After clicking on the ASAM link, enter information to search for the client.

**Browse Options**

**ASAM Record Search**

Agency Site: --Select--

CDC ID:

Consumer ID:

Last Name:

First Name:

- Then click Add ASAM.
